OK –

That opens up some space; think it's worth adding the bit in red to the PFAS story?

On July 5, in response to a request from Senator Hassan following the PFAS Summit, RA Dunn and leadership from NH Department of Environmental Services joined Senator Hassan for a tour of the Coakley Landfill Superfund site located in North Hampton, NH. PFAS has been identified in wells around the site and the EPA is conducting groundwater migration mapping and fish tissue testing this summer. The Region's PFAS monitoring work at this site was discussed at a June visit to a local community member's home by RA Dunn, Senior Counsel Erin Chancellor, and Deputy AA Steven Cook.

OK – see below for new paragraph on that issue (I had to shorten the section on the MS4 stay request to make everything fit on one page). New Clean Copy attached.

Looks good but need to add a sentence about why we went to Coakley. I.e pfas has been identified in wells in area. Working this summer on additional groundwater migration testing as well as fish tissue testing

RA Dunn Joins Senator Hassan on Tour of Coakley Site, Following up on PFAS Summit

On July 5, in response to a request from Senator Hassan following the PFAS Summit, RA Dunn and leadership from NH Department of Environmental Services joined Senator Hassan for a tour of the Coakley Landfill Superfund site located in North Hampton, NH.

Legal Briefings: Oppositions Filed to Stay Requests for NH Small MS4 General Permit

Deliberative Process / Ex. 5

Northeast/Mid-Atlantic Representatives Discuss Expanding Electric Vehicle Infrastructure

On June 28, Region 1 staff provided assistance to state environmental and transportation agency representatives at a meeting of the Northeast/Mid-Atlantic Transportation Climate Initiative (TCI), highlighting opportunities to incorporate electric charging and layover accommodations for freight into plans for expanding electric passenger vehicle infrastructure along TCI's Federal Highway Administration-designated Alternative Fuel Corridor.

Buzzards Bay and Cape Cod Region Address Nutrient Pollution

On June 27, Region 1 staff met with partners from the Buzzards Bay and Cape Cod region to discuss continued action to address nutrient pollution. Participants included the Buzzards Bay National Estuary Program, Buzzards Bay Coalition, MA Coastal Zone Management Agency, Cape Cod Commission, and Massachusetts Department of Environmental Protection.

Site Wide Remedy Decision, BASF Former Ciba-Geigy Corrective Action Site, Cranston, RI

Region 1 finalized a site-wide remedy decision at the BASF Former Ciba-Geigy corrective action site. The clean-up includes prior stabilization measures, PCBs- and VOC-contaminated soil removal and capping, and treatment with ISCO and ozone reactive barrier. Groundwater monitoring and activity use restrictions will be employed. A public meeting was hosted by the responsible party to provide the community information on the upcoming work at the site.

Upcoming Major Decisions and Events

NH Brownfields Grant Recipients' Announcement Event

Region 1 is coordinating a "big check" press event in New Hampshire on Thursday, July 12. This event will celebrate all three new Brownfields grants being awarded to New Hampshire recipients this year.
